

IONATE™ MENTIVE

Detect anomalies and predict business KPIs using AI-based intelligent 'eyes' - proactively

AT A GLANCE

Technical Features

- Business KPIs
- Predictive Maintenance
- Intelligent Forecasting
- Recommendation Engine
- Compliance & Protection
- Scenario simulation (what-if)
- Black Swan event estimation
- Curve Fitting

KPI Examples

- Service disruptions
- Abnormal purchases
- Attempts to log in
- Bot reviews
- Inventory backorders
- Cyber intrusion

BACKGROUND

Challenging to realize important business KPIs from chaotic data

Companies collect a huge amount of data about their business and ongoing operations. KPIs can measure business health objectives like performance, operational effectiveness, and popularity.

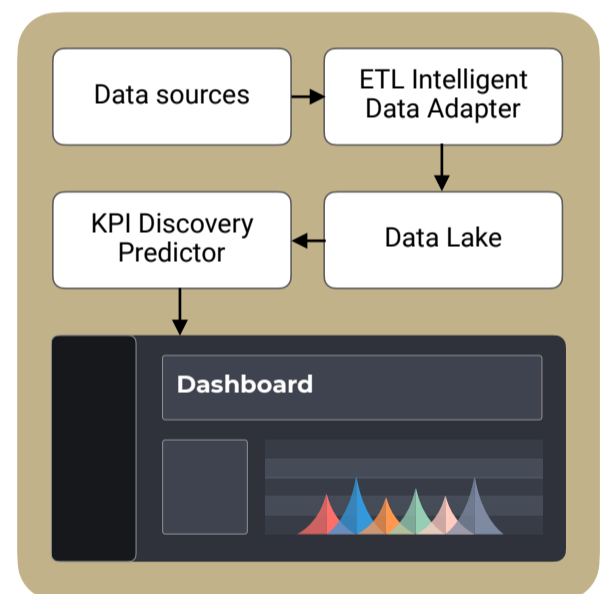

But companies struggle to make sense of the data, even with the help of technology. They fail to derive patterns that can help them with better forecasting and better business decisions.

SOLUTION

AI / ML based predictive engine & data science platform, delivering KPIs and forecasting

We leverage state of the art tools and methodologies in machine learning,

data processing & data visualization to predict future insights.

BENEFITS

-  Forecasting
-  Fault-tolerant
-  Future-proof

About Ionate

Ionate provides an endgame (turnkey solution) for Digital Transformation with its proprietary AI / ML platform and products. Enterprises can not only modernize their legacy systems, but also operate on high-performing infrastructure and scale their business, with security, predictive forecasting, and data protection.
