

# IONATE™ APPDATE

Modernize your legacy systems using AI / ML  
under 6 months with 100% Business Parity

## AT A GLANCE

### 100% Business Parity

- Business Data
- Business Logic
- Business Processes

### Supported legacy

#### Thick clients

Oracle Forms  
Visual Basic  
Powerbuilder  
Delphi  
Centura  
Clarion

#### COBOL / CICS / RPG

Mainframe  
Mid-range  
Fujitsu  
Unisys  
HP  
CA

#### Monolith

Java Weblogic /  
WebSphere  
IBPM BPM  
Oracle ADF  
Oracle SOA  
JBOSS  
EJB, JSF, ASP

*For any other legacy, we need  
5-7 weeks to train our machine  
and we're good to go!*

## BACKGROUND

### Challenging to scale the business with legacy systems facing EOL

Enterprises who digitized their business processes 15-20 years ago rely on old technologies, and hence face business operational risks and challenges that make them slow. Nimble tech-savvy rivals are able to easily compete with old lions.

Many companies are modernizing using traditional programming, stretching it for 3-5 years, which risks of them being obsolete quickly. Others are opting for approaches such as lift-and-shift or re-platform, which only provide short-term gains.

## SOLUTION

### Automated conversion of code and architecture into cloud-native micro services using AI / ML

A true modernization approach assists in mitigating the risk associated with legacy systems by ensuring that the modernization works not just at the software level but also the architecture level.

We modernize the business logic and architecture in a natural way making it maintainable and extensible. Our AI/ML platform engine learns the syntax of the source language is able to perform an idiomatic transformation to the target technology.

## BENEFITS

Cost savings

Time to market

Future-proof

### About Ionate

Ionate provides an endgame (turnkey solution) for Digital Transformation with its proprietary AI / ML platform and products. Enterprises can not only modernize their legacy systems, but also operate on high-performing infrastructure and scale their business, with security, predictive forecasting, and data protection.
